PROFESSIONAL SUMMARY

Web development fascinates me because it combines creativity, problem-solving, and technical skills to bring ideas to life in the digital space. The ability to design and build functional, user-friendly websites and applications empowers businesses and individuals to share their vision with the world. I'm drawn to the dynamic nature of web development, where continuous learning is essential to stay ahead of evolving technologies and trends. This field challenges me to think critically, troubleshoot effectively, and innovate while staying focused on creating seamless user experiences.

I'm particularly passionate about front-end development, where I can blend aesthetics with functionality, and I enjoy the satisfaction of turning a concept into a visually appealing and interactive product. I am equally intrigued by back-end development and how it supports the structure and performance of applications.

Working in web development allows me to contribute to impactful projects, collaborate with diverse teams, and solve real-world problems. I am eager to leverage my skills in HTML, CSS, JavaScript, and other modern frameworks to build responsive, accessible, and optimized websites. A career in web development aligns perfectly with my passion for technology and my desire to make a tangible difference in the digital landscape.

SKILLS

- Javascript, JQuery
- express
- Typescript, React
- HTML
- Programming
- Experienced with web API
- MySQL, Sequelize
- MongoDB, Mongoose
- CSS, Bootstrap
- Responsive design
- Code debugging

EDUCATION

University of Denver, Denver, CO

Bootcamp Certificate, Web Design, Expected in 04/2025

I am currently in a web development course and as soon as I started coding i fell in love the idea of being able to speak through a computer and show the world your artistic design is amazing! I am a very fast learner and I promise to quickly become someone you and your company can depend on!
